Calculați pentru primii n termeni:

```
a) 1 + 3 + 5 + 7 + \dots si 1 \cdot 3 \cdot 5 \cdot 7 \cdot \dots;
Instructiunea WHILE:
import java.util.Scanner;
public class SabinaSprincean {
public static void main(String args[]) {
      Scanner sc = new Scanner(System.in);
      System.out.println("Introduceti valoarea lui n: ");
      int n = sc.nextInt();
      int sum = 0;
      int prod = 1;
      int i = 1;
      while ( i <= n) {
             sum = sum + (2*i-1);
             prod = prod*(2*i-1);
             i++;
      System.out.println("Suma este: " + sum);
      System.out.println("Produsul este: " + prod);
      sc.close();
}
}
Instructiunea FOR:
import java.util.Scanner;
public class SabinaSprincean {
public static void main(String args[]) {
      Scanner sc = new Scanner(System.in);
      System.out.println("Introduceti valoarea lui n: ");
      int n = sc.nextInt();
      int sum = 0;
      int prod = 1;
      for (int i = 1; i<=n; i++) {</pre>
             sum = sum + (2*i-1);
             prod = prod*(2*i-1);
      System.out.println("Suma este: " + sum);
      System.out.println("Produsul este: " + prod);
      sc.close();
}
}
   b) 2 + 4 + 6 + 8 + \dots şi 2 \cdot 4 \cdot 6 \cdot 8 \cdot \dots;
Instructiunea WHILE:
import java.util.Scanner;
public class SabinaSprincean {
public static void main(String args[]) {
      Scanner sc = new Scanner(System.in);
      System.out.println("Introduceti valoarea lui n: ");
      int n = sc.nextInt();
      int sum = 0;
      int prod = 1;
```

```
int i = 1;
      while ( i <= n) {
             sum = sum + 2*i;
             prod = prod*(2*i);
             <u>i</u>++;
      }
      System.out.println("Suma este: " + sum);
      System.out.println("Produsul este: " + prod);
      sc.close();
}
}
Instructiunea FOR:
import java.util.Scanner;
public class SabinaSprincean {
public static void main(String args[]) {
      Scanner sc = new Scanner(System.in);
      System.out.println("Introduceti valoarea lui n: ");
      int n = sc.nextInt();

}
}
Calculați suma primilor n termeni: 1 - \frac{1}{2} + \frac{1}{3} - \frac{1}{4} + \frac{1}{5} - \frac{1}{6} + \cdots
Instructiunea WHILE:
import java.util.Scanner;
public class SabinaSprincean {
public static void main(String args[]) {
      Scanner sc = new Scanner(System.in);
      System.out.println("Introduceti valoarea lui n: ");
      int n = sc.nextInt();
      double sum = 0;
      int i = 1;
      while ( i <= n) {
             if (i%2==0) {
             sum = sum - 1d/i;
             i++;
             }else{
             sum = sum + 1d/i;
             i++;
      System.out.println("Suma este: " + sum);
      sc.close();
}
}
Instructiunea FOR:
import java.util.Scanner;
public class SabinaSprincean {
public static void main(String args[]) {
      Scanner sc = new Scanner(System.in);
      System.out.println("Introduceti valoarea lui n: ");
      int n = sc.nextInt();
      double sum = 0;
      for ( int i = 1; i<=n; i++) {</pre>
             if (i%2==0) {
             sum = sum - 1d/i;
             }else{
             sum = sum + 1d/i;
      System.out.println("Suma este: " + sum);
      sc.close();
}
}
```

De la tastatură se introduce un număr natural n. Alcătuiți un program Java ce va calcula suma și produsul primilor n termeni: $\frac{1}{2} + \frac{2}{3} + \frac{3}{4} + \frac{n}{n+1}$

Instructiunea WHILE:

```
import java.util.Scanner;
public class SabinaSprincean {
public static void main(String args[]) {
      Scanner sc = new Scanner(System.in);
      System.out.println("Introduceti valoarea lui n: ");
      int n = sc.nextInt();
      double sum = 0;
      double prod = 1;
      int i = 1;
      while ( i <= n) {
            sum = sum + i/(i+1d) ;
            prod = prod*(i/(i+1d));
            i++;
      System.out.println("Suma este: " + sum);
      System.out.println("Produsul este: " + prod);
      sc.close();
}
Instructiunea FOR:
import java.util.Scanner;
public class SabinaSprincean {
public static void main(String args[]) {
      Scanner sc = new Scanner(System.in);
      System.out.println("Introduceti valoarea lui n: ");
      int n = sc.nextInt();
      double sum = 0;
      double prod = 1;
      for (int i = 1; i<=n; i++) {</pre>
            sum = sum + i/(i+1d) ;
            prod = prod*(i/(i+1d));
      System.out.println("Suma este: " + sum);
      System.out.println("Produsul este: " + prod);
      sc.close();
      }
      }
```
